Sweet Yeast Feast

Division: Life Sciences

Category: Intermediate

Region: Lambton County

City: Petrolia, ON

School: LCCVI

Abstract: I tested five sugars: icing sugar, blackstrap molasses, corn syrup, sugar twin, and granulated sugar (using the latter as my control) to observe their effect on yeast in bread. The height of the dough was observed throughout the bread making process. I also considered the difference in sweetness and texture.

Awards	Value
The University of Western Ontario Scholarship Bronze Medallist - \$1000 Entrance Scholarship Sponsor: University of Western Ontario	\$1 000
Bronze Medal - Life Sciences - Intermediate Sponsor: Pfizer Canada	\$300
Total	\$1 300
