Jakub Jedrzejczak

Water Power

Division: Health Sciences / None

Category: Junior

Region: Windsor

City: Windsor, ON

School: Parkview P.S.

Abstract: I created a device which will be generating electricity using sewage and tap water in our homes. This device is a small scale hydro-electric generator. I invented this because I believe that it would save money, reuse dirty water and conserve energy.

Biography

My name is Jakub Jedrzejczak. I was born in Poland and I came to Canada when I was 2 and I am proud of my Polish background. I am in Grade 7 and I go to Parkview Elementary School in Windsor. My hobbies are soccer and guitar. But I also am a very active person and I like to play all kinds of sports. I like to work hard and I set goals for myself. In the future I hope to be an engineer and/or a soccer player. I have won a few awards. Most of the awards I have won in my life have been from sports until this year. This year I encountered many awards. I got into the Principal's Honour Roll two consecutive terms, and also got into the Regional and now the Canada Wide Science Fair. I am thus far proud and encouraged by my success to continue to achieve even more. So this is me, Jakub Jedrzejczak.
