Capacitors: Battery of the Future

Division: Engineering & Computing Sciences

Category: Intermediate
Region: Windsor
City: Windsor, ON

School: F.J. Brennan High School

Abstract: It is a commonly held opinion that capacitors discharge too rapidly to ever

become a useful energy source. I have designed a device that allows for steady discharge of a capacitor so it can power various electronic devices

for several hours. Such a battery can be recharged in minutes.

Awards	Value
CAP Physics Prize - Intermediate	\$250
Sponsor: Canadian Association of Physicists	
Honourable Mention - Engineering - Intermediate	\$100
Sponsor: Youth Science Foundation Canada	
Total	\$350
