Hair Dye...Or Hair Die?

Division: Life Sciences / None

Category: Senior

Region: Peterborough

City: Peterborough, ON

School: Peterborough Collegiate

Abstract: This project investigated which colour of hair dye had the most damaging effects on hair. Hair extensions were separated and dyed a specific colour; no colour, blonde, red, brown and black. After a two week dying period, microscope and break tests were used to determine the damage of each treatment. The results showed that blonde and black hair dye caused the most damage.

Biography

I am currently an ARCT level piano student through the Royal Conservatory of Music, I have won numerous awards in the Peterborough Kiwanis Music festival throughout the years and been nominated twice for the Provincial Kiwanis Music Festival in piano. I play on the school rugby team, and also performed a lead role in the play The Dining Room by AR Gurney held at PCVS earlier in this school year. I am currently a red belt in Hap Ki Do. I am planning on continuing my studies into post secondary school in Environmental Sciences.
