

## CWSF 2005 - Vancouver, British Columbia

## **Larah Martinson**

## **How Does Your Reaction Measure Up?**

Division: Biotechnology

Category: Junior

PO Box 297

Region: **Chinook Country** City: Calgary, AB

School: Red Deer Lake School

**Abstract:** I tested how reaction time varied with age using a stopwatch to collect data.

I concluded that age does affect reaction time. Reaction time increases in

children up to the age of 12 and slows down as aging occurs.
