Sukhmani Singh

I-Kill-O-Watt Power Plant

Division: Health Sciences / None

Category: Junior

Region: South Fraser

City: Surrey, BC

School: Khalsa School (Surrey)

Abstract: This project produces electricity without using the Earth's natural resources. It enables us to be self reliant in situations such as power outages; puts money back in our pockets, and gives us a great exercise. This invention will make Earth a better place to live in for future generations and should be owned by everyone who wants to make a difference in the world.

Biography

My name is Sukhmani Singh, I am 12 yrs old and attend Khalsa School in Surrey B.C. I am a straight "A" student and very athletic. I love to swim, skate, and dance. I play the violin and Piano. I enjoy soccer and learn Tae kwon Do. I am a Blue belt in Tae Kwon Do. I love to collect Postage stamps, currency from all around the world and stickers. I have lot of collection of all these. I have won my school science fair for five year, and I am also the first person, from my school, to go to the Canada Wide Science Fair. I hope to be an Automation Engineer. I love machines and I always think about ideas to make this planet a healthier place to live in, so I think this career is best suited for me. I would like to make enough money to give donations to all charities around the world, because I feel that there are people who need the money more than I do. I am grateful to get the opportunity to be at the Canada Wide Science Fair and I hope to learn a lot from this experience.
