Are Weather Forecasts Accurate?

Division: Earth & Environmental Sciences

Category: Junior

Region: Edmonton

City: Spruce Grove, AB

School: Oliver, Nellie McClung

Abstract: Accuracies of five-day weather forecasts between two sources were compared. Temperature data were recorded from respective websites over forty-five days and compared to the actual records. Environment Canada was more accurate for day one and day two and The Old Farmer's Almanac was more accurate on days three to five.
