Tasty Teeth

Division: Health Sciences / None

Category: Junior

Region: Canadian Rockies

City: Canmore, AB

School: Lawrence Grassi Middle School

Abstract: Tasty teeth is a innovative project that can be used in the sports world. The project is a flavored mouth guard that has an insertible flavoring agent that begins to dissolve when it comes in contact with human saliva. The flavor inserts can be renewed after they lose their flavor.

Biography

My name is Logan Dobson I'am 13 years old and I live in Canmore Alberta. Out of school I'am a freestyle skier and a whitewater kayaker and have participated in national level events for both. For the future, I want to go to university for culinary arts and open a cafe in Revelstoke where I can manage it and be a pro skier there. I would also like to make it to the 2014 olympics for mogul skiing. Recently, my best achievement was competing in two skiing events at Alberta winter games and recieving gold medals in both events.
