Abstract: The current project focussed on assessing the levels of antioxidant activity in a variety of mushrooms. Over the course of the project, I also decided to add common foods, which were reputed to have antioxidant activity. Such as blueberries, pomegranate juice, and three types of green tea. I compared the results to a common Vitamin E (Trolox).

Awards	Value
The University of Western Ontario Scholarship Bronze Medallist - \$1000 Entrance Scholarship Sponsor: University of Western Ontario	\$1 000
Bronze Medal - Life Sciences - Junior Sponsor: Pfizer Canada	\$300
Total	\$1 300
