Water Me, Naturally

Division: Engineering & Computing Sciences / None

Category: Intermediate

Region: Northern Saskatchewan

City: La Ronge, SK

School: Churchill Composite H.S.

Abstract: This project studied natural and treated water in the growth of bush bean plants. The three experiments, of twenty-five days each, took place inside my home during August through mid-October. An analysis of the mineral content of the water and the results of the experiments found that the natural water was more beneficial to bean plant growth.

Biography

My name is Madelaine Lazurko. I live in La Ronge, Saskatchewan. My birthday is in December 1992. I am currently a grade ten French Immersion student. I participate in the school choir and the yearbook club. I am a senior member of the La Ronge figure skating club and a program assistant for the Can Skate and Young Blades program. I play the orchestral piano and have qualified for the provincial music festival for the past five years. I am a distinction student with the Academy of Music and have retained my distinction status for four years. I am an active member in my local parish and frequently help with services. In my spare time, I like to read, swim and spend time with my family and friends. The past few years I have been in the top five of the regional science fair and have won numerous scholarships. I have been twice to the Winner's Showcase science fair in Regina where I displayed my project. My goal is to graduate with a bilingual diploma and later take university classes working towards an Arts & Science degree.
