Alyssa Borutski

The Stroop Effect

Division: Life Sciences

Category: Intermediate

Region: Renfrew County

City: Barry's Bay, ON

School: Madawaska Valley District H.S.

Abstract: My project on the Stroop Effect includes a battery of tests involving the brain and conflicting mental tasks. Participants will be asked to perform activities, which will send their brain conflicting messages. I will record and analyze the data, coming to a further conclusion.

Biography

My name is Alyssa Borutski and I am fifteen years old. I live in the small town (1200 people) of Barry's Bay where I currently live with my mother (Lorraine), father (Clifford), and younger sister (Kali). I come from a large extended family (my parents both have 7 brothers and sisters) of the Polish background. I live on Wadsworth Lake, and enjoy swimming and waterskiing. I love sports and I have played on my high school's varsity basketball, volleyball, soccer, badminton, and track & field teams, just to name a few. Some of my hobbies include: baking (I make novelty cakes), scrapbooking, and participating in my high school's Student Reach Team (trivia). I volunteer within the community and am apart of a choir. Awards I have received include: 1st Place in the Gauss Mathematics Competition, MIP (Most Improved Player) in Basketball, Principles Award of Student Leadership, 1st Place in Health Science Category (Intermediate), RCRSTF Award of Excellence and Best Investigative Science Project. I have am Captain of the varsity Basketball team, and would possibly like to get a basketball scholarship. In the future I want to pursue a career in medicine, possibly working as a family or sports medicine physician.
