

CWSF 2008 - Ottawa, Ontario

Jordan Deloughery

The Incredible Bridge

Division: Health Sciences / Environmental Innovation

Category: Junior

Region: Renfrew County

City: Pembroke, ON

School: Champlain Discovery P.S.

Abstract: An experiment that was built, tested.....and worked! To prove a popsicle stick bridge using 178 popsicle sticks would hold Jordan Deloughery while standing on a board on the top platform of the bridge without breaking or causing damage to the bridge.

Biography

I'm Jordan Deloughery; born in Pembroke, Ontario on February 01, 1995. Favourite interests: drawing, hunting, fishing, waterskiing, tubing, snowboarding, exploring for special/unusual items, building with lego. I've played hockey at 5 years old; this past season I played 2nd year Peewee and named Captain by my coach for my leadership, sportsmanship, enthusiasm and love of the game. I'm in grade 7; Champlain Discovery PS. My last report card were all "4's". I've made school teams; cross-country running, volleyball, basketball, and badminton. I enjoy meeting other people. I wish to become a Civil Engineer. I've numerous hockey trophies. My exciting moment was when our 4 players, including myself and goalie to have a penalty shot relay race on the Scotiabank Ice Surface during the 1st and 2nd period of the last game of the Ottawa Senators season. In front of a sold-out crowd vs the Boston Bruins; we had a penalty shot relay race against hockey players from Ottawa. I'm mostly proud placing first in our School Science Fair, placing first in the RCSF; best of all to be chosen first to attend the CWSF; seeing the trophy with my name engraved. This is a first-time for my entire school.
