The Power of Wind

Division: Health Sciences / Environmental Innovation

Category: Junior

Region: Frontenac, Lennox & Addington

City: Inverary, ON

School: Calvin Park P.S.

Abstract: My project tests the effectiveness of different wind turbines using a wind tunnel. It measures voltage and milliamps created by the turbines, and using that data I can determine which turbine is the most effective out of the ones I tested.

Biography

My name is Lucas D'Albertanson I am 14 years old and went to last years science fair in Truro, Nova Scotia. I am part of the Tech Crew at my school. I enjoy playing sports like soccer and tennis. I also like Remote Control planes and other aircrafts.
