Shane Stevenson

Can You See The Light

Division: Health Sciences / Automotive

Category: Junior

Region: Alberta Central East

City: Hanna, AB

School: J.C. Charyk Hanna School

Abstract: My project is a headlight wiper. It runs off the cars battery so it is very efficient. There is a button in the car and for every one time you press it the headlight swipes one time. It would be a very unique invention to have on your car. It is affordable and adaptable to the everyday vehicle consumer.

Biography

Hi, My name is Shane Stevenson. I am fourteen years old and my favorite thing to do is play hockey. I play Bantam Hockey and the team I support is the Calgary Flames. I also like to play video games, read books, and hang out with my friends. My favorite books are the Harry Potter series by J.K. Rowling. When I graduate I hope to get into the University of Calgary and study to become a Chiropractor. After that I hope to attend the Chiropractic College in Vancouver. To do this I will need good marks and be an honour student I am a very competitive person and will always take the most extreme choice, unless it is completely and utterly dangerous. My favorite subjects in school are Social, Science, and Computers. If I cannot be a chiropractor I hope to become a High School and/or Junior High Teacher or a Video Game Developer. In school I play Badminton and Volleyball. I have many hockey and honour role awards and I collect hockey pucks (especially Calgary Flames ones).
