Barometer "The Weather Expert"

Division: Engineering & Computing Sciences / None

Category: Junior

Region: South Fraser

City: surrey, BC, Surrey, BC

School: T E Scott Elementary

Abstract: Barometer "The Weather Expert" is an experiment. To find which barometer was more efficient we compared an aneroid barometer and a mercury barometer for twelve days. The barometers were homemade and worked well. The conclusion was the mercury barometer was more efficient. A lot of information and facts were used along with data.

Biographies

April - April Mica was born on December 20, 1995 in Manila, Philippines. About two years ago April moved to Surrey, B.C. She lives with her father, mother and new baby brother Anthony. April is twelve and has always been interested in science. She has won three gold medals in the past few months and strives for more. April also enjoys video games, singing, playing bass guitar, hanging out with her friends and family and playing on the computer. April is very energetic at the right times and loves to just be herself. April hopes to be an astronaut because she wants to discover and explore the wonders of outer space.
