#### The Dilemma of Musical Allusions -uses and abuses of music

**Division:** Sciences de la vie / Aucun

**Catégorie:** Junior

**Région:** Toronto

**Ville:** Toronto, ON

**École:** Le Collège français

**Sommaire:** Music can make us feel good, but the same music can evoke very different emotions in others. This project uses various audio illusions to expose how we can be fooled by what we hear. The conclusion is that we need to better understand music's role in our lives.

#### Biographie

I was born in Wales and lived in England until I was 3 when my family moved to Canada for 2 years. We then lived in France for 4 years where I enjoyed climbing, trampolining and skiing. I went to the local school, made friends and learned to speak French. 3 years ago we returned to Canada. I go to College Francais, a French speaking school. Now I practice swimming and running (I have run 2 10ks). I am learning Latin with an online course and the Cambridge online site. I find it interesting to learn a language that is the root of many European languages.

#### Prix
