Sunglasses - Catch Some Rays?

Division: Health Sciences

Category: Junior

Region: South Shore

City: Lunenburg, NS

School: Centre Consolidated

Abstract: Ultra-violet (UV) radiation presents a significant health hazard to the human body. Long-term exposure to UV radiation can contribute to eye diseases. This project examines whether sunglasses providing good UV protection can be obtained at reasonable cost. Sunglasses of varying prices were obtained and tested. All sunglasses tested provided adequate UV protection.
