

ESPC 2008 - Ottawa (Ontario)

Taylor Lidster

Pollution Par Ignorance

Division: Génie et sciences de l'informatique / Innovation environnementale

Catégorie: Junior

Région: Chatham-Kent

Ville: Chatham, ON

École: École Sainte-Catherine

Sommaire: What I was trying to find is a way to show how we pollute, what happens when it gets into our soil and what it affects. I did two experiments to attempt to show how it affects the environment and people as well. One showed how pollutants affected plant life and the other showed how pollution contaminates our aquifers and enters our water supply.

Biographie

I am 13 years old and attend Ecole Ste Catherine, grade 8 in Pain Court, Ontario. I participate in school volleyball, improve, dance and singing. I regularly volunteer for the Heart & Stroke and the YMCA. I am attending Ecole Secondary Pain Court next year and hope to attend university after. I've won many awards in school activities and also the Kiwanis Music Festival.
