Climate Change: Symptoms and Solutions

Division: Engineering & Computing Sciences / Environmental Innovation

Category: Intermediate

Region: Manitoba First Nations

City: Split Lake, MB

School: Chief Sam Cook Mahmuwee Education Centre

Abstract: My project is based on the study on the effects of climate change in the world and my community, the solutions to climate change, and my invention on renewable energy idea.

Biography

I live in a small reserve called Tatasweyak known as Split Lake. I'm 15 years old I go to Chief Sam cook Mahmuwee education school in grade 9. I take part in a badminton club, school trips, and helping out for various people who needs my help. I am sometimes an outdoor and indoor person when it comes to the season. I like to read books, draw, write stories, playing games, and watching movies. My goals are to go to another school to get into Dalhousie University to become an environment and marine or criminal justice lawyer. So far I have achieved in going to high school without any failed grades or being upgraded. My aunts, uncles and my mom have finished high school and that is what motivates me in continuing or furthering my education.
