The Photoelectric effect

Division: International / None

Category: Intermediate

Region: Fundy

City: St. Andrews, NB

School: Sir James Dunn Academy

Abstract: The voltage potential of different types of light sources was measured. All in a controlled testing area, where there was only one source of light being used. Two different tests were performed.

Biography

I am a gamer, artist, write, reader, musician and vegetarian. My project was the photoelectric effect and etc. I drink tea and am pretty mellow, unless experiencing a mood swing in which case I'm hyper. But that rarely happens. Like it happened once and that was it.
