#### Go Water Down Under

**Division:** Earth & Environmental Sciences

**Category:** Junior

**Region:** Northern Saskatchewan

**City:** La Ronge, SK

**School:** Churchill Community High School

**Abstract:** People change oil in their cars all the time and virtually everyone spills some on the ground in the process. They think, 'Hey! It won't hurt'. My project investigated how to filter oil from water by working with four different surfaces that people may have for laneways, and also different filtering materials.
