Abstract: Found in Saskatchewan, wild sarsaparilla belongs to the same plant family as ginseng. Twenty-four extracts were obtained from this plant, two of which were most effective in killing human cancer cells without greatly affecting normal human cells. Novel anti-cancer compounds were thus isolated from a local plant.

Awards	Value
The Manning Innovation Achievement Award and \$4000 Manning Young Canadian Innovation Award Sponsor: Ernest C. Manning Awards Foundation	\$4 000
