Predicting Aggression Using Multiple Regression

Division: Physical & Mathematical Sciences / None

Category: Intermediate

Region: Central Interior British Columbia

City: Prince George, BC

School: Westside Academy

Abstract: "Predicting Aggression Using Multiple Regression" created a written test to predict hockey player's aggression, to be used by hockey scouts to find aggressive players. Statistical analysis was used to see if the test was predictive. A test was created that predicts correctly the level of aggressiveness of a hockey player 99.7% of the time.

Biographies
