Ryan Walker

A Switch to a Brighter Tomorrow

Division: Health Sciences / None

Category: Senior

Region: Beaufort-Delta

City: Tuktoyaktuk, NT

School: Mangilaluk School

Abstract: The purpose of this project is to replace the current household light switch. The current house hold light switch flawed, this flaw is that fact that a person has to think about turning the light off. The ultimate goal of my project is to create a light switch that does not involve a person thinking about turning the light off.

Biography

I was born in Edmonton, Alberta, I lived there for four years of my life. In 1996, my parents, siblings, and I moved to Tuktoyaktuk, NT. Since preschool I have attended Mangilaluk School. I had perfect attendance through out grade one to grade eight. I always kept going to school because my parents and grandparents told me to learn new things. I would like to have anyone of these careers: Lawyer, Crime Scene Investigator, Pilot, or a Politician. Some things I enjoy doing are soccer, running, reading, traveling, hanging with friends, talking with friends over the net, and all together just havin a good time.
