

## CWSF 2005 - Vancouver, British Columbia

### Tara Moore

#### Oil Spills

**Division:** Earth & Environmental Sciences

**Category:** Junior

**Region:** Halifax

**City:** Shad Bay, NS

**School:** Brookside Junior High School

**Abstract:** This project tested different sorbents placed in oil-contaminated ocean and fresh water, determining which sorbent picked up the most oil in the least amount of time. These oil soaked sorbents were then burned to find the most efficient fuel source by measuring the burning time and the heat emitted.
