

## ESPC 2009 - Winnipeg (Manitoba)

### Helen Martens

#### Eggs

**Division:** Internationale / Aucun

**Catégorie:** Junior

**Région:** Peace Country

**Ville:** Fort Vermilion, AB

**École:** Hill Crest Community School

**Sommaire:** This project is an experimental study in which I researched and boiled eggs to see if I could find the best method for boiling an egg. In my research, I found a lot of interesting information about eggs nutrients, dangers, and boiling methods.

#### Biographie

I am a grade 8 student at Hill Crest Community School in Blumenort, Alberta. Blumenort is a rural farming community near La Crete and Fort Vermilion in far northern Alberta. I live on a small farm with my parents and 9 siblings. My favourite subjects are Science and Language Arts. I enjoy and play a variety of sports, but basketball would have to be my favourite. I also enjoy the outdoors and prefer to be active than sitting inside. One day I hope to become an actress or own my own business.
