What Makes Calves Grow

Division: Sciences physiques et des mathématiques / Aucun

Catégorie: Junior

Région: Northwestern Ontario

Ville: Murillo, ON

École: Thunder Bay Christian School

Sommaire: My test was on which substance gives holstein heifer calves the best advantage in growth until weaning. Milk Replacer or Whole Milk? Which has a better weight gain for calves. This project was an experiment. It helps farmers and vealed growers because they want their calves to excel in growth the most in this period. Also, how the milk substance is absorbed through the digestive tract.

Biographie

Hello my name is Blake Grootenboer. I live on a dairy farm in Murillo and I have 1 brother and 2 sisters. I go to Thunder Bay Christian School and I am in grade 8. I help out in the school by helping fundraise and helping the younger grades with their work. In the community I help at the Shelter House and in my church I help also collecting money for the poor and homeless. I am also interested in many things including hockey, soccer, baseball, showing cattle, and playing dodge ball. I have won many awards in calf showing and have won top 3 in Beginner projects in grade 6 at the Northwestern Ontario Regional Science Fair.
