Fresh Water

Division: Engineering & Computing Sciences / Environmental Innovation

Category: Junior

Region: Manitoba First Nations

City: Nelson House, MB

School: Otetiskewin Kiskinwamahtowekamik

Abstract: The project is about solar distillation. It is an attempt to produce fresh drinking water from salt water or other contaminated water through distillation. It is the development of a simple technology be used as an effective way of providing fresh water for human use where availability of fresh water is limited.

Biography

My name is Janine Yetman and I am in grade 8. I like outdoor activities. My favorite subjects are Math, Cree and Gym. I like to help my friends whenever I can. My favorite sport is Volleyball. When I grow up I want to be a veterinarian, because I like animals. I once helped save my friends dog by administering our own pet first aid kit. When I was 9, I played piano and sang Twinkle, Twinkle Little Star, and won the mini queen competition. At my school I was in Junior Chief and Council for 2 years. At last years school awards I won the Academic Achiever, Phys-ed and Computer Awards.
