Cold Snaps

Division: Health Sciences / None

Category: Junior

Region: Wood Buffalo

City: Fort McMurray, AB

School: Fr M Beaugard Education Community Centre

Abstract: In our project "Cold Snaps" we tested different types of batteries to see which one would last the longest in cold weather. We got our idea from when we go skidoing or doing other outdoor winter activities and when we try to take pictures the batteries always die in our camera. So we tested to see which would last longest.

Biographies

Jody - Hi, my name is Jody Maclsaac. I am 13 years old. I have been going to Father Beaugard all of my life. My favorite things to do are play with my friends, play my saxophone and do outdoor activities. I have recently been awarded Honors with Distinction and the Spirit of Beau Award. I am honored to be a part of the National Science Fair and be able to go to Winnipeg, MB.

Tabaitha - Hi. My name is Tabaitha Brett. I am 13 years old. I go to Father Beaugard school. I enjoy playing with friends, going to the movies, doing outdoor activities, playing with my dog and reading. I am honored to go to Winnipeg as a finalist of Wood Buffalo. I am very excited and I am hoping to have a great time.
