Antibacterial or Not

Division: Life Sciences

Category: Intermediate

Region: Leader

City: Sceptre, SK

School: Leader Composite School

Abstract: This project is based on the idea that not all antibacterial products are what they say they are, and that price may or may not make a difference to their effectiveness. Bacterial cultures were used to test the products. Results were documented and reported along with a history of the life of bacteria.

Awards	Value
The University of Western Ontario Scholarship Bronze Medallist - \$1000 Entrance Scholarship Sponsor: University of Western Ontario	\$1 000
