Corey Harrison

Utilizing Wind and Solar Energy

Division: Engineering & Computing Sciences / Environmental Innovation

Category: Senior

Region: St. James-Assiniboia

City: Winnipeg, MB

School: Collège Sturgeon Heights Collegiate

Abstract: The reason I did this project was because I wanted to do something to help prevent global warming so I decided wind and solar power would be a great place to start. I decided that I would use this project to help people become aware of how they can maximize their energy generation with either a wind turbine or a solar panel.

Biography

My name is Corey Harrison. I am 17 years old and im just an average guy like most of the kids today. I enjoy many common interests such as all sports, though hockey is my favourite and also I enjoy music and play the drums as well as sing. I have two sisters, one older one younger, and one younger brother. I'm interested in a field involving electronics or Sustainable Development. In the summer I enjoy spending time with my friends and family and sometimes I will work at Kodiak Kids Camp as a councilor. I enjoy going to movies and playing strategy games with my friends.
