Could A Lemon Power The World?

Division: Engineering & Computing Sciences / Environmental Innovation

Category: Junior

Region: Rideau-St. Lawrence

City: Smiths Falls, ON

School: Notre Dame C.H.S.

Abstract: In my project I explain what I know and what I need to know. I explain my hypotheses my purpose and my procedure. After I did my tests I found out that my apple worked better than a lemon. In my analysis I explain why the apple worked the best.

Biography

My name is Michelle Vala. I am 13 years old and live near Carleton Place Ontario. I live at home with my mom, my dad, my two brothers, and my Uncle. I am very active in sports. My favourite sports are hockey and soccer. Just recently my team won the ODWHA (Ottawa District Womens Hockey Association) play-offs, and I scored the winning goal in the final. I also enjoy running long distances like cross-country and track and field at school. I love to play the piano and the clarinet. I go to school at Notre Dame Catholic High School in Carleton Place. I am in the french immersion program and maintain an "A" average. I also enjoy shopping and hanging out with my friends.
