

CWSF 2009 - Winnipeg, Manitoba

Brian Larson

SafeD Pet Solutions

Division: Health Sciences / Automotive

Category: Intermediate

Region: Alberta Central East

City: Hanna, AB

School: J.C. Charyk Hanna School

Abstract: This project focused on the alpha prototype development of a device designed to monitor a number of pre-determined conditions within an environment to ensure the safety and comfort of a pet(s) when left unsupervised. The Pet SafeD Monitor sends values of temperature, peak temperature within an interval, humidity and calculated humidex to an individual (pet owner) carrying a cell phone via text messaging.

Biography

I am a grade nine student from Hanna, Alberta. I live on a small ranch with my parents and three sisters. My interests include most sports, wildlife, music and outdoor activities such as hunting, fishing, camping etc. I play center guard on the high school football team. In the winter, I curl competitively and spend most weekends traveling to bonspiels and competitions. In the summer, I spend as much time as possible on the golf course. I also work part time at the golf course. I'm a volunteer and committee member for the Hanna Chapter of Ducks Unlimited and a member of the Hanna Rod and Gun Club. I would like to pursue a career in Fish and Wildlife upon completion of high school. Last year, I attended the CWSF in Ottawa. I had a fantastic time.
