Waste Management

Division: Engineering & Computing Sciences / Environmental Innovation
Category: Intermediate
Region: Fundy
City: St. Andrews , NB
School: Sir James Dunn Academy
Abstract: My project is testing to see if there is a more efficient way to extract biogas from household waste. And if there is, what can we do with the extracted gas.

Biography

I am in Grade 10 and participate in cross country, track and field and soccer. For the past three years, I've been our class rep on Student Council at Sir James Dunn Academy. I'm also an active member of Cadets. My hobbies and interests include playing sports, downhill skiing, fishing and competitive shooting as well as other outside activities.
