

CWSF 2010 - Peterborough, Ontario

Jamil Merali

Why did the Moose Cross the Road?

Division: Biotechnology

Category: Junior

Region: North Bay

City: corbeil, ON

School: Silver Birches Senior P.S.

Abstract: Ungulate encounters on the road and highways are on the rise. My system which is very cost effective, will help the motorist to reduce speed and avoid a possible ungulate collision thus saving the automobile and possibly the drivers life too.

Biography

My name is Jamil Merai, I am 12 years old and I attend Silver Birches Senior Public School in North Bay, Ontario. Science is one of my favourite subjects, in addition to Math and Design and Technology. Next year, I will attend the Science and Technology Wireless program in high school. I enjoy building circuits and working with electronics. I try to get my hands on any old machines and pull them apart to see how they work. My future plan for university is to be in the engineering field and practice electronic engineering. In my spare time, I like to bike and fish. My summers are spent at my cottage relaxing and fishing and I look forward to it every year.
