

## ESPC 2010 - Peterborough (Ontario)

### Kaylee Kapitany, Alison Lee

#### Foiled Again!

**Division:** Sciences de la vie

**Catégorie:** Junior

**Région:** Lethbridge

**Ville:** coaldale, AB

**École:** R. I. Baker Middle School

**Sommaire:** This project is based on increasing the growth of a regular bush beefsteak (*lycopersicum esculentum*) tomato plant. We have used tinfoil as a reflector for the underside of the plants leaves. Through this expirement we have observed that the plants with tinfoil around the base have grown faster than the ones without tinfoil.

#### Biographies

Kaylee - My name is Kaylee, I am 12 years old and am currently in grade 7. I have tons of interests and hobbies. Some of my favorite activities are playing lots of sports and spending time with my family and friends. This is the first time I have ever entered the Letbridge Regional Science Fair. I am excited to go to Ontario, as this being the first time I have ever gone. I enjoy doing things with my hands like handling a stick in hockey. I am very happy to be going to Nationals and am looking forward to entering Science Fair next year.

Alison - My name is Alison lee and I'm in grade 7. I have many different hobbies and interests. This is the first year I have entered science fair. Some of my accomplishments have been... I have been in the girl guides of Canada program for 7 years and am working on my 8th year. I also am a very good athlete and currently hold third place for 2008 in the 10-12 girls' singles out of Canada for racquetball. I have done many community projects such as project porch light, where I delivered almost 400 energy efficient light bulbs to 400 different houses. I have a big hobby for cooking; I have been I a cooking class in school. Another one of my hobbies...
