

## ESPC 2005 - Vancouver (Colombie-Britannique)

### Zubair Kharadi

#### Internal Asthma Controller Phase II

**Division:** Sciences de la santé

**Catégorie:** Intermédiaire

**Région:** Edmonton

**Ville:** Edmonton, AB

**École:** Edmonton Islamic School

**Sommaire:** This is an implantable device that functions to regulate asthma. It is a combination of two technologies; pacemaker and smart pill. The device detects the signs of difficult breathing and immediately releases medication to suppress an attack. This device would eliminate the need to continually carry medication.
