

CWSF 2010 - Peterborough, Ontario

Kylan Vidak, Tanna Miskolczi

Solar Speculation

Division: Health Sciences

Category: Junior

Region: Carlton Trail

City: Englefeld, SK, Englefeld, SK

School:

Abstract: Can you be environmentally friendly while still suiting your needs? Well, we took the question into consideration and discovered that people are not as 'green' as they should be which is why we created a solar panel out of pop cans. Because we used all recyclable materials we believe that if everyone would do the same the environmental impact would be less.

Biographies

Kylan - My name is Kylan Vidak. I was nominated for the grade 7/8 eagle award. I used to play hockey and still would love to, also in school I play badminton. When I graduate I would like to go to SIAST for mechanic, and electrician. At the regional science fair my partner and I won 1st place in our category, also we won 2nd place in the whole science fair allowing us to move on to national science fair.

Tanna - My name is Tanna Miskolczi. I am involved in the school in many ways, such as, I play volleyball and curling. I also usually attend all the activities the community has to offer, (ex) mini-telemiracle, or church. I do some babysitting, and I cut grass for the church regularly in the summer time. My hobbies include collecting rocks/coins, playing piano, painting, and building things. The summer is my favorite time of the year because I enjoy going up to the lake, and hanging out with my friends. I also love playing outdoors, and running with my dog. When I graduate I plan on becoming an architect because I love to design things, and constantly ...
