Monica Mala

Teen Girls

Division: Sciences de la santé

Catégorie: Intermédiaire

Région: Kitikmeot

Ville: Cambridge Bay, NU

École: Kiilinik High School

Sommaire: High school is a big step for any student. For girls it's a total life changing experience. Through a survey, this project identifies those experiences. We discovered that the students did not fit our stereotypical categories. Based on the results, we identified strategies to help teen girls cope with their challenges.
