Recycle Sorter

Division: Life Sciences

Category: Junior

Region: Fraser Valley

City: Abbotsford, BC

School: Clayburn Middle School

Abstract: This project uses gravity and inclined planes to sort more than one item into separate blue bags. Three types of beverage containers of various shape, size, and material can be sorted effectively. This invention organizes recyclables in a quick and easy way. Its ability to save hands-on labour may encourage more people to recycle.

Biography

I am a grade seven student. My favorite subjects in school are Math and Science. I have played on my school's basketball team for the last two years and enjoy sports. I have danced since I was three years old. I went to the Fraser Valley Regional Historical Fair in 2007 and have been to the Fraser Valley Regional Science Fair the last two years. This is my first time going to the Canada Wide Science Fair and I am very excited to be going.
