Madison Gray

Nurturing Germs

Division: Sciences de la vie

Catégorie: Intermédiaire

Région: Sahtu

Ville: Norman Wells, NT

École: Mackenzie Mountain School

Sommaire: My project on Nurturing Germs was a project that ended up being something different then it was originally planned as. This project is on culturing bacteria with the goal to be able to do so in your everyday environment. I found that it is possible to do so but only with the correct nutrients, materials and work done on the project.

Biographie

My name is Madison Gray, I am a ninth grade student attending Mackenzie Mountain School in the Northwest Territories. For the past 2 years I have received the Math and Science award for my class. I continue to remain on the honor roll and have continued on from my school level of science fair for a number of years.
