Christine Eamer

Blowing Away Energy / L'energie s'essouffle

Division: Sciences physiques et des mathématiques

Catégorie: Junior

Région: Rideau-St. Lawrence

Ville: Brockville, ON

École: Ecole Ange-Gabriel

Sommaire: I wanted to know which setting on a hair dryer would use less energy to dry hair - high or low. My hypothesis that the high setting would use less energy was incorrect. This experiment can be applied to everyday life, helping to reduce greenhouse gases when the low setting is used.
