Nathan Heuvel

Excuse Me

Division: Physical & Mathematical Sciences

Category: Junior

Region: Rideau-St. Lawrence

City: Cardinal, ON

School: St. Lawrence Academy

Abstract: I did my project on anaerobic digestion. I wanted to do my project on this because I saw a picture of a digester in my geography text book. I believed this would be a neat project to do. I was trying to produce enough gas to cook a meal for a family of four. I designed a digester for a small household.

Biography

My name is Nathan Heuvel. I like to ride and rebuild dirt bikes/allterrain vehicals and tinker with electronics. my current projects are modding a portable nintendo 64 and rebuilding a 1977 100cc motor bike. my past projects were rebuilding a 2cc dirt bike and rebuilding a pocket bike. i wish to build an electric car and a hydrogen motor bike. unlike other kids i do not get an allowance so if i want money i have to earn it myself i work very hard to make the money i need for my projects, any spare time i have i use on my projects i don't usally go out for fun, i find tinkering fun. i love green energy and enviormentale gadgets.
