Pollen for the Pollinator

Division: Life Sciences

Category: Junior

Region: Northern British Columbia

City: Charlie Lake, BC

School: Charlie Lake Elementary

Abstract: My project explores the problem bumblebees are facing with supplies of pollen. I compare the pollen size of native plants (the standard size that bumblebees evolved with) to that of 'introduced' plants and garden flowers. I collected pollen samples last spring and summer, then photographed and measured 25 of each type. The volume was calculated and averaged. Pollen sizes were then compared to each other.

Biography

I am a happy cheerful person. I enjoy skiing and other sports in school. In school i play badminton and volleyball. At home i horse back ride and love playing with my dogs. I have three horses and two dogs. I play the piano at home and the flute in the school band.
