Production of RNA to Investigate the Mechanism of Viral Replication

Division: Earth & Environmental Sciences

Category: Senior

Region: Manitoba Schools Science Symposium

City: Winnipeg, MB

School: Fort Richmond Collegiate

Abstract: The Crimean-Congo Hemorrhagic Fever Virus is predicted to rely on its molecular biology for replication. The DNA template of the RNA was designed and RNA was then transcribed off the DNA using T7 RNA polymerase followed by gel electrophoresis. Presence of RNA proves that this methodology is a viable way to produce this specific RNA for further studies towards rational development of therapeutic tools.

Biography

My name is Neilloy Roy, I was born on February 13, 1992 at the St. Boniface Hospital. My parents are immigrants from East India. For the last eighteen years I have lived in the same house in Southern Winnipeg. I am currently attending my senior year Fort Richmond Collegiate. I enjoy the alternative rock genera, bands such as The Offspring, Nirvana and The Smashing Pumpkins. My favourite TV shows are Star Trek: Deep Space Nine and Star Trek: The Next Generation. When it's not snowing in Winnipeg I like a taking jog around my neighbourhood. I volunteer at the Victoria General Hospital. In the fall of this year I will be attending the University of Manitoba. My ultimate goal is to one day be a professional in the Medical field.

Awards

Value

The University of Western Ontario Scholarship Bronze Medallist - \$1000 Entrance Scholarship Sponsor: University of Western Ontario	\$1 000
University of Ottawa Entrance Scholarship Senior Bronze Medallist - \$1000 Entrance Scholarship Sponsor: University of Ottawa	\$1 000
Bronze Medal - Biotechnology & Pharmaceutical Sciences - Senior Sponsor: Youth Science Canada	\$300
Total	\$2 300
