Emily Hodgson

Bacteria

Challenge: Health

Category: Junior

Region: Sahtu

City: Norman Wells , NT

School: Mackenzie Mountain School

Abstract: Everyday people touch many different substances. Therefore, I investigated which substances grow the most bacteria. To achieve this goal I had to follow a certain procedure which included waking up everyday at 7:00am to observe my science fair project. I achieved my goal and found out that the bottom of a shoe grew the most bacteria, which proved my hypothesis was right.

Biography

Emily Hodgson live in the North West Territories Born in the north enjoy outdoor activities and most sports, involved in Speed Skating, Hockey and Track and Field. I enjoy skidoo-ing and skiing.
