

ESPC 2005 - Vancouver (Colombie-Britannique)

Brenna Schilds, Shauna Chabot

Toothbrushes: Friend or Foe

Division: Sciences de la santé

Catégorie: Junior

Région: Northern British Columbia

Ville: Dawson Creek, BC

École: Ecole Frank Ross Elementary School

Sommaire: To find out how much bacteria grew on a toothbrush, we tested the toothbrushes of 8 individuals over different periods of time: 1 week, 2 weeks, 4 weeks, and 8 weeks. Bacteria levels decreased for most test subjects after two weeks and continued to decrease at 8 weeks.
