

ESPC 2011 - Toronto (Ontario)

Forrest Tower, Ashley Anderson

Applications of Biofuel Technologies in Third World Countries

Défi: Innovation

Catégorie: Sénior

Région: Central Interior British Columbia

Ville: Prince George, BC

École: Westside Academy

Sommaire: Applications of Biofuel Technologies for Third World Countries created an anaerobic digestion biogas system. This system was designed to produce an alternate, renewable fuel for cooking and producing light in third world countries. The biogas system was created using parts that are locally available in third world countries such as Honduras.

Biographies
