Spotting the Difference

Défi: Environnement

Catégorie: Sénior

Région: Cape Breton

Ville: Sydney, NS

École: Riverview High School

Sommaire: Lady beetles were collected in disturbed and undisturbed habitats to investigate habitat preference and abundance of native and non-native lady beetles. Only 1.5% of lady beetles in these habitats were native species. Additionally, most non-native lady beetles were in undisturbed habitats, the assumed habitats of native lady beetles. This suggested that non-native lady beetles may be adversely affecting native lady beetles on Cape Breton Island.

Biographie

Kathleen is a grade 12 student at Riverview High School in Nova Scotia. When not writing biographies in the third person, Kathleen enjoys a wide multitude of activities, such as practising piano, playing soccer and reading books. In the future, Kathleen hopes to develop a broad range of knowledge in... everything. Until then, she plans to attend Dalhousie University in the fall of 2011.

Prix

Valeur
