You've Got Mail

Division: Engineering & Computing Sciences

Category: Intermediate

Region: Western Newfoundland

City: Hawke's Bay, NL

School: Roncalli Central High School

Abstract: My project is an automated mailbox that can be installed in any home. It automatically brings mail inside your house while you are on vacation, and will alert you of delivered mail when you get home. As burglars check mailboxes before breaking into houses, this device can deter break-in theft.
